**EVO23**  
Crimson Red

**EVO24**  
Racing Green

**EVO25**  
Platinum Silver

## PREMIUM RANGE

**EVO30**  
Carbon Fibre

**EVO31**  
Macassar Wood

**EVO32**  
Maple Wood

## WHY USE A WATCH WINDER?

An automatic watch has a mechanism that requires regular motion to keep the inner spring constantly charged, this motion is usually provided as it is worn. Once removed from the wrist the stored energy will only run for a short while, depending upon the model, then the watch will need to be manually rewound and reset.

A watch with further 'complications', – date/time/lunar phase/world time etc. the task of rewinding and recalibrating if it runs down is best avoided.

Furthermore, watches of this calibre are precision instruments and like all thoroughbreds they actually benefit from exercise – if left unwound for long periods, internal lubricants can be lost from critical areas which will eventually lead to excessive wear on components and subsequent lack of accuracy.

'evolution' watch winders have features designed to mimic the action of a watch being worn. The watch is held at a precise angle while being rotated and the winder can be set to run at the optimum requirement for your particular watch to ensure it is permanently wound.

# evocube

The **evocube** is a versatile and popular watch winder one which Rapport have been perfecting for many years.

Being available as single units allows you to obtain as many as you need to match your collection of watches. They come in nine different colours all in a high gloss finish - have fun - match your watch, your decor or your mood. See the whole range on the following pages.

The case is precision constructed in wood, finely finished with several lacquer coats. The watch carrier is covered in black leather, has rubber side clips and is fully adjustable to accept any size and style of watchstrap.

The winding mechanism runs virtually silent and it offers several levels of control suitable for the majority of prestige automatic watches on the market today.

## TECHINICAL SPECIFICATIONS

### 01 THE MECHANISM

The frequency and speed of rotation are important factors the 'evolution' range has addressed in ensuring the precision workings of your watch are correctly maintained. The oscillations of the winder simulate the motion of the wrist when the watch is being worn - it revolves in three directions, being clockwise, counter-clockwise & bi-directional winding and resting periodically according to whichever setting you choose.

### 02 ADJUSTABLE PAD

The watch carrier has a screw adjustment at the front and a sprung pad at the back to allow the fitting of virtually any size watch strap, leather or link bracelet.

A soft padded leather covering to the carrier prevents damage to the watch. The carrier fits snugly into the cup and there is no danger of the watch becoming detached. It also cleverly comes to rest with the watch in the perpendicular position whenever the rotation cycle is stationary.

### 03 RECHARGEABLE BATTERY

The winder is fitted with a rechargeable battery which enables the winder to be operated by battery or by mains supply. When the mains are plugged in to the winder, it will automatically charge the battery. It takes about 3-4 hours for a full charge which enables the winder to operate for about 35- 45 days depending on the programme used.

### 04 GUARANTEE

We are sure that you will be absolutely delighted with the 'evolution' Watch Winder yet, as with all Rapport luxury products we offer a full 24 month guarantee.

# evocube

## 05 CONTROLS

All functions are activated by pressing the button with our company's logo. The illuminated display shows the function number.

Each of the modes available are displayed in the table below:

	Rotation per day	Direction
0	STOP	
1	650	Clockwise winding
2	650	Counter-clockwise winding
3	650	Bi-directional winding
4	850	Clockwise winding
5	850	Counter-clockwise winding
6	850	Bi-directional winding
7	1800	Clockwise winding
8	1800	Counter-clockwise winding
9	1800	Bi-directional winding

## MULTI-BOXES

Also available are double and quad cases, constructed in gloss finish Ebony, into which you can slot individual evocube MKII watch winders in any combination of colours you desire. Each compartment is lined with leather to allow a snug, scratch-proof fit of the units. These cases are wired to allow operation of all winders with a single electric adapter.

**evo Quad box MKII**  
SIZE: 280 X 280 X 150MM

FRO44 - Box to take  
Four Single Watch Winders

**evo Double box MKII**  
SIZE: 140 X 280 X 150MM

FRO42 - Box to take  
Two Single Watch Winders

**evo Double box**

*Unmistakable British craftsmanship since 1898*

Rappport have over one hundred years of association with fine timepieces – the 'evolution' range represents the culmination of an evolutionary process to provide the ultimate accessory for owners of automatic, self winding watches.

Each 'evolution' model is painstakingly crafted using the finest quality components. The newly developed watch holder can accommodate any size strap and the finely tuned mechanism uses the best technical advances to keep your watch in prime condition.

This contemporary range of watch winders is further testament to Rappport's reputation for quality, craftsmanship and service.
